

Aerial Work Platforms

Aerial Work Platforms - There are various lift truck accessories presented on the market. They could help transform your lift truck so that you can expand your ability to pick stuff up or finish clean up tasks and material handling with less effort.

Many of the accessories are particularly designed to be able to fit on the forks themselves. Blade extensions for instance, are used whenever you require a lot more blade length, which increases lifting capacity. Fork extensions come in lengths varying from forty eight to one hundred twenty inches. Triangular or rounded attachments are another type utilized whenever transferring rolled material so as to ensure it does not roll off of the standard flat blades.

Examples of lifting attachments comprise pivoting and telescoping boom or crane accessories. They can come in quite a few various styles and are most often used for transporting poles, metal bars, lumber and different sort of bulky items. Other attachments such as different kinds of hook plates and hooks are available to carry items utilizing a chain or sling. Magnetic lifters and slab lifters are other stuff which could be utilized along with hook accessories. Slab lifters are specialized attachments which are utilized for picking up various materials that are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools which attach to your lift truck in order to make transferring rolls of carpet much easier. The accessory hooks onto the lift truck's blades and has a pole which goes through the center of the carpet roll.

There are many different kinds of lift truck accessories which could be utilized for facility maintenance such as snow forks. These blades attach to front end loaders and could move materials like snow, dirt and soil. Other popular cleanup attachments include magnetic sweepers and standard sweepers. Standard sweepers includes a broom that the forklift blades hook onto for sweeping big spaces like factory floors, parking lots and warehouse. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in areas where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up quick and simple.

Material spreaders are other attachments used on lift trucks. These spreaders are helpful for a variety of applications like spreading insecticides, seeds, ice melt, rock salt, pellets and fertilizers.

Work platforms are another optional lifting attachment which lots of businesses make use of day after day. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few models available that are capable of folding up and storing into a smaller space. Work platforms are designed to raise personnel up to an overhead location making use of the lift truck. Larger platform units have added space for personnel in order to bring tools and other necessary objects intended for the task. Usually work platforms are made of steel or ploy material.
