

JLG Forklift Parts

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV trip. After spending numerous years establishing his family built crane company with his brother, John had no idea that this trip would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road trip.

Whilst on their journey, John spent time conversing with past business contacts whom the Groves stopped to see along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John uncovered a vast market for a product that could promptly and safely elevate individuals in the air to accomplish maintenance and other building services.

Upon returning from their travels, John formed a partnership with two friends and acquired a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty employees, they manufactured and sold the first JLG aerial work platform. The company incorporates some of the simple design elements of that original lift into current versions.

JLG forklifts have come a ways since Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. Today, the business proudly continues to expand itself into a range of markets globally and develops new products to ensure consumers are capable of being more efficient and perform in the workplace within a safer environment.
