

Clark Forklift Parts

Clark Forklift Part - Performing worldwide, there are now 350,000 Clark forklifts and lift trucks in operation, with in excess of 250,000 of those in service in North America. Clark has five main lines of forklifts across the world, making it one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 exclusive brands of forklifts, with parts covering more than 120,000 particular parts for all of its automated equipment. Your local Clark Dealer is your complete source for availability of all your parts requirements supplied by Clark Totalift.

Clark has a phenomenal Parts Supply team. The items warehouses are conveniently positioned in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their customers and their sellers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Driven to offer the highest level of value and service to our users, Clark remains on the cutting edge when it comes to enhancing productivity and benefiting performance.

Clark Totalift has a very amazing global support network. With over 550 locations worldwide, dealer representation in over 80 nations and 230 locations in North America, their high level of dedication to their consumers predominates the materials handling industry.

Clark proudly remains an innovative leader of the material handling industry, revolutionizing protection features such as the worker restraint system. This exceptional dedication to safety is now a customary feature on every lift truck.

Clark's recurrent mission to possess the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first forklift maker across the world to be certified with the internationally accepted quality standard ISO 9001 for each and every one of their production plants. Furthermore, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be ready for any number of environmental limitations, thus placing them in a prevailing industry position.

Clark has chosen the system of "Lean Production" at all of its assembly facilities for the reason that this method is extremely economical and enables minimal use of resources. Developed to ensure maximum efficiency, this system is intended to discover and acknowledge the most efficient ways for production facility management. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

By working in concert, Clark's product suppliers and engineers communicate towards enhancing product effectiveness while minimizing costs. The new value engineering program combines progressive product improvement and provides improved customer support and service within the industry.
