

Rotators for Forklift

Rotator for Forklifts - Forklift attachments are presented for many functions. For instance, the forklift rotator is helpful for rotating, moving and lifting drums and barrels. There are other attachments useful for carrying carpet rolls and cartons, for dumping waste materials or sand. Some of the most commonly used forklift attachments are the fork positioner, rotator, clamp, and side shifter attachments. These tools come in a variety of dimensions to fit a variety of forklift models. They are designed to hold really heavy objects and are an advantage to a lot of factory and warehouse surroundings.
