

Barrel Clamp

Barrel Clamp - A Barrel Clamp is really a mechanical or hydraulic accessory designed for a lift truck. It could be used to compress the item you want to transport using the forklift and is typically utilized for handling paper rolls, barrels, and kegs. A few designs of barrel clamp attachments also have a rotate function. Like for instance, the rotate function permits the individual operating the forklift to be able to put in a vertically stored paper into the horizontal intake of a printing press.
